
PLASTIC SURGERY GROUP London

Breastfeeding combined with own fat or implants

In the case of a breast lift, the hanging breast is raised again and the skin mantle tightened.

The volume is retained, the breast is reshaped and positioned.

We work only with your own tissue.

Through these surgery your breast will get more youthful look. Scars develop around the nipple and sometimes vertically over the breast. For more extensive tightening we also put a scar in the lower breast crease.

QUESTIONS YOU MAY WANT TO ASK DURING THE CONSULTATION:

- ARE THE SCARS VISIBLE?
- HOW DOES MY BREAST WOULD LOOK IN 10 YEARS?
- DO I HAVE THE SAME FEELING IN THE BREAST AFTER THE SURGERY?
- IS THERE A RISK THAT CANCER COMES BACK IN THE BREAST?

INFORMATION ABOUT THE PROCEDURE:
